# AFTER THE DIAGNOSIS ROAD MAP

Many thanks to the Minnesota chapter of HDSA including Jessica Marsolek, Jim Goodchild, Arlene Jennings, Lora Horan-Kimsal, and Noreen Hoft for their original idea for this document.

#### Learn about Huntington's disease

Learn <u>here</u> or <u>here</u>.

## **Educate your Family and Friends about HD**

- 1. Tell those closest to you that HD affects everyone differently, but most will experience profound changes in mood, thinking abilities, and movements.
- 2. Communicating with children deserves special consideration because they are also at risk of inheriting HD.
- 3. Good sources for educational information are: <u>hdreach.org</u>, <u>hdbuzz.net</u>, <u>hdsa.org</u>, <u>hdyo.org</u>

# Establish an Emotional Support Network for Coping with the Diagnosis

Family, friends, and faith group members.
Learn more <u>here</u> or <u>here</u>.

### Consider who should be on your Medical Care Team

- Physicians experienced with HD are rare and may take some effort to find. Huntington's disease Centers provide multidisciplinary specialists in more than 50 hospitals across the US.

3. View a complete listing of HDSA Centers of Excellence here.

#### **Start or continue Practicing a Healthy Lifestyle**

- 1. Eat well and exercise regularly.
- 2. Surround yourselves with people who are kind.
- 3.<u>Learn more</u>.

5

6

#### **Take Stock of your Finances**

- 1. People active in their careers with family members they are supporting can work with financial planners and estate lawyers.
- 2. Learn how you can use state and federal government assistance programs.
- 3. Government Programs include Social Security, Social Security Disability Insurance, and Supplemental Social Security.
- 4. Figure out how Medicaid, Medicare, and your insurance may work together.
- 5.<u>Learn more</u>.

#### **Update or make Legal Arrangements**

- 1. Creating a Will, Advanced Directives, and Power of Attorney agreements provides clear instructions for how you want to live and your wishes for end-of-life care.
- 2. Learn more <u>here</u> and <u>here</u>.

#### **Changes to Nutritional Requirements as HD Progresses**

- 1. Likely need more calories.
- 2. Swallowing challenges may create a need for alternative foods with different consistencies.
- 3. Discuss the eventual use of a feeding tube with medical professionals and care partners while in the early stages of HD.
- 4. Learn more.

# Create a Safe Home Environment

- 1. Update layouts and make alterations in the home to prevent slips, falls, bumps, and bruises. 2. Plan for natural disasters.
- 3. Learn about reducing aggression and increasing safety in the home.
- 4. Learn more.

8

# **Develop a Long-Term Care Plan**

- 1. Options include: Care at home by care partner or professional caregivers, assisted living, group home, nursing care facility.
- 2. Hospice Care.

3. Learn more <u>here</u> and <u>here</u>.

# End-of-Life Considerations

- 1. Provider Orders for Life-Sustaining Treatment (POLST) communicates the directives to medical care providers about treatment in an emergency.
- 2. Living Will/Healthcare Directives declare your wishes regarding end-of-life medical care if unable to communicate your desires.
